#weekendusers Express experiments for better health.

19-09-2016

A synchrotron is a particular type of cyclic particle accelerator, descended from the cyclotron…

Audiences and aims

- The scientific community – to provide information about ESRF activities.

- The ESRF/synchrotron community – to provide information, and strengthen the community of users.

- Science and technology decision makers – to promote ESRF activities and increase the impact of ESRF projects.

- The general public, young people – to foster engagement with scientific issues.

The following packages are needed for this theme:

- Beamer
- TikZ

If your LaTeX distribution is installed without them, please update and install these packages.

The following colours are defined in the template:

No more than three secondary colours should be used together in a composition. Grey will complement all of the colours.

- Videos can be played from within the presentation:

- This may or may not work on Windows machines, but tested to work on Linux.
- This requires a supporting presenter, *e.g.* **pdfpc**.
- Also, at least the "base", "good", "bad", and "libav" GStreamer plug-ins should be installed.
- The video file should be in the defined path (it is not embedded into the presentation, but linked to it).
- If for any reason the video will not play, the embedded image will be displayed statically instead.

- For uncovering content in stages check out:
  - □ The `\pause` option
  - □ `\includegraphics<1>` , `\includegraphics<2>` , ...
  - □ `\only<1>` , `\only<2>` , ...
  - □ Within TikZ pictures:
    - ◇ `\uncover<1>` , `\uncover<2->` , `\uncover<3>` , ...
    - ◇ This works for any element in any sequence.
  - □ etc...
- A great tool for showing LATEX presentations is **pdfpc**.
  - □ It supports screen spitting, with overview of all the slides
  - □ Support for videos in pdf presentations
  - □ Support for notes
  - □ A timer
  - □ Open source software
  - □ Command line interface
- A lot of other possibilities to explore – Beamer is more powerful than it looks!
